

When it comes to email management, you have many choices.

Over the last few years Gmail and Microsoft have built products that compete with SaneBox and offered them for free, most notably Google Inbox, Focused Inbox, and Office 365 Clutter. Here's why we're still better than any of the free alternatives.

AI Filtering

SaneBox	Category	Focused Inbox	Google Inbox
Personalized algorithms adapt to user's preferences	Personalized Algorithms	Global set of rules apply to every user	Global set of rules apply to every user
Moving an email to the correct place trains the algorithm immediately.	Immediate Training	Multiple moves required to train the algorithm (unclear how many)	Multiple moves required to train the algorithm (unclear how many)
Full suite of filtering options (newsletters, receipts, CC, subject, domain etc)	Customized Features	Offers basic email filtering	Offers basic email filtering and custom training folders
Works across all email apps, clients and devices, wherever you already check your email	Works Everywhere	Works on Outlook only	Works on Google Inbox only
